

CENRIFKI™ REMS PATIENT STATUS FORM

This form must be regularly completed for all patients treated with CENRIFKI™. At the time this form is due, this form may also be used to report adverse events suggestive of serious and potentially fatal liver injury.

You can complete this form online at [CENRIFKIREMS.com](https://cenrifkirems.com) or fax it to the CENRIFKI™ REMS at 1-877-912-0072.

This form must be completed and submitted for each patient:

- Prior to treatment initiation (baseline)
- Monthly for the first 3 months, then every 3 months during treatment

Note:

The completion of the laboratory tests (see frequency below) and the submission of the **Patient Status Form** (per the schedule shown above) are done at different intervals.

Adverse events suggestive of serious and potentially fatal liver injury must be reported to the REMS by any **one** of the following actions:

- Contact the CENRIFKI™ REMS by phone
- Submit a completed **Liver Adverse Events Reporting Form**
- Submit a completed **Patient Status Form**

If an event is submitted via the **Patient Status Form**, it is not necessary to also complete and submit a **Liver Adverse Events Reporting Form** or contact the CENRIFKI™ REMS by phone to report the same event. The **Patient Status Form** must still be submitted regularly, even if liver adverse events were already reported on the **Liver Adverse Events Reporting Form**.

Patient Information (Fields marked with an * are required.)			
*First Name: Frank		*Last Name: Angelino	
*Birthdate (MM/DD/YYYY): 05/02/1950		REMS ID: FA3874123434899	
*Address Line 1: 1212 Santa Barbara			
Address Line 2: Apartment 1010			
*City: Santa Barbara		*State: CA	*ZIP Code: 90210
Prescriber Information (Fields marked with an * are required.)			
*NPI #: JC99123324639	*First Name: Jordan		*Last Name: Charney
Practice/Facility Name: Santa Barbara Neurology		REMS ID: JC676098822981	
Address Line 1: 1231 Santa Rosa Blvd			
Address Line 2:			
City: Irvine		State: CA	ZIP Code: 90456

CENRIFKI™ REMS PATIENT STATUS FORM

Patient Liver Monitoring and Authorization to Initiate or Continue Treatment (Fields marked with an * are required.)

Certified prescribers must assess each patient's liver function (ALT, AST, alkaline phosphatase and bilirubin) and appropriateness of initiating and continuing treatment as follows:

- Prior to initiation (baseline)
- Weekly for the first 3 months after treatment initiation
- Monthly for months 4 to 12
- Every 3 months during treatment

*Has the patient's liver function been assessed during this reporting period as described above? ☐ Yes ☒ No

If Yes: Most recent date(s) laboratory test(s) were taken (MM/DD/YYYY): 03/28/2025

- What is the patient's ALT (alanine aminotransferase) value(s)? 11
- What is the patient's AST (aspartate aminotransferase) value(s)? 77
- What is the patient's alkaline phosphatase value(s)? 55
- What is the patient's total bilirubin value(s)? 55

*Is this patient authorized to initiate therapy or continue to receive CENRIFKI™? ☒ Yes ☐ No

If No: ☐ Withheld ☒ Discontinued

If Discontinued: ☐ Discontinued because of liver-related event ☒ Discontinued not due to liver-related event

Serious Adverse Events Reporting (Fields marked with an * are required.)

*My patient experienced a serious and potentially fatal liver injury. ☒ Yes ☐ No

Liver adverse events meeting any of the following criteria should be considered and reported as serious and potentially fatal liver injury.

- Development of any liver adverse events leading to liver transplantation or resulting in a fatal outcome or considered to be life-threatening, or
- Development of any liver adverse events meeting any of the laboratory criteria presented below:
 - ALT or AST greater than 8 x ULN (upper limit of normal), or
 - ALT or AST greater than 5 x ULN for greater than 2 weeks, or
 - ALT or AST greater than 3 x ULN and total bilirubin greater than 2 x ULN, or
 - ALT or AST greater than 3 x and less than or equal to 5 x ULN with the appearance of fatigue, nausea, vomiting, right upper quadrant pain or tenderness, fever, rash, anorexia, jaundice, and/or eosinophilia

Event Information (see definition of seriousness criteria on page 3):

*Please select Yes or No for each seriousness criteria below:

*Death ☐ Yes ☒ No	*Life-threatening ☐ Yes ☒ No
*Hospitalization ☒ Yes ☐ No	*Important Medical Event ☐ Yes ☒ No

*Was treatment discontinued due to this event? ☒ Yes ☐ No ☐ Not Available

Liver Laboratory Information:

*Were liver enzymes (ALT/AST) elevated greater than 3 times ULN? ☒ Yes ☐ No ☐ Not Available

*Were there symptoms of liver injury? ☒ Yes ☐ No

If Yes (check all that apply): ☒ Fatigue ☐ Nausea ☒ Vomiting ☒ Right upper quadrant pain or tenderness
☒ Fever ☒ Rash ☐ Anorexia ☒ Jaundice ☒ Eosinophilia

Prescriber Signature (Fields marked with an * are required.)

If an event of serious and potentially fatal liver injury is reported, the prescriber will be contacted for further information regarding the report. Pertinent laboratory results will be requested.

*Signature:

Jordan Charney

*Date:

12/07/2025

*Printed Name:

Jordan Charney

Please Note:

A CENRIFKI™ REMS prescriber delegate may view, edit, and initiate completion of this form on behalf of the certified prescriber of record. The certified prescriber must review and sign this form prior to submitting to the REMS. The certified prescriber of record is responsible for compliance with the REMS requirements, including monitoring, evaluation, and management of each patient under their care.

If the patient has been discontinued from CENRIFKI™ treatment, the prescriber/prescriber delegate must notify the REMS.

CENRIFKI™ REMS PATIENT STATUS FORM

Definition of Serious Criteria:

Death

Report if you suspect that the death was an outcome of the liver event and include the date if known.

Life-threatening

Report if suspected that the patient was at substantial risk of dying at the time of the liver event or use or continued use of product might have resulted in the death of the patient.

Hospitalization (initial or prolonged)

Report if admission to the hospital or prolongation of hospitalization was a result of the liver event. Emergency room visits that do not result in admission to the hospital should be evaluated for one of the other serious outcomes (e.g., life-threatening, required intervention to prevent permanent impairment or damage, other serious medically important event).

Important Medical Events

Report when the liver event does not fit the other outcomes, but the liver event may jeopardize the patient and may require medical or surgical intervention (treatment) to prevent one of the other outcomes. Examples include allergic bronchospasm (a serious problem with breathing) requiring treatment in an emergency room, serious blood dyscrasias (blood disorders), or seizures/convulsions that do not result in hospitalization. The development of drug dependence or drug abuse would also be examples of important medical events.
